1. Purpose and scope. This bulletin when used in conjunction with SB 742-1 provides a method for determining the serviceability of the subject item. The function testing in this procedure will be accomplished under a centralized control program managed by the Armament Materiel Readiness Command (ARRCOM), DRSAR-QAS, Rock Island, IL 61299. The bulletin is to be used in the assessment of the serviceability of individual signal cartridges only. The provisions of this bulletin are mandatory for use by all Department of the Army organizations within CONUS and OCONUS with an ammunition receipt, storage, and distribution mission. This bulletin is not intended for use by organizations with stocks in basic loads. Additional information pertaining to frequency of test, sample selection, defect standards, reports and records are contained in SB 742-1.

2. Errors, omissions, and recommended changes. Direct reporting of errors, omissions, and recommendations for improving this bulletin is authorized and encouraged. DA Form 2028 (Recommended Changes to Publications) will be completed and forwarded to Commander, ARRCOM, ATTN: DRSAR-QAS, Rock Island, IL 61299.

3. Safety. The surveillance function testing must be conducted in accordance with the provisions set forth in appropriate safety regulations and implementing instructions, with special attention de- voted to technical manuals describing the item.

4. Personnel. Function testing will be conducted under the supervision of a Quality Assurance Specialist (Ammunition Surveillance) herein after referred to as QASAS.

5. **Size of sample.** The number of cartridges required to make up a representative sample from a lot for a surveillance function test is as follows:

For check investigation as directed
For classification investigation .40
For confirmation investigation . as directed

6. Sample selection. Sample cartridges will be selected in accordance with the provisions of SB

This bulletin supersedes SB 742-1310-94-459,22 April 1977
