ORGANIZATIONAL MAINTENANCE REPAIR PARTS  
AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. Scope

This manual is a list of repair parts and special tools required for the performance of Organizational Maintenance of the Paint Spray Gun.

2. General

This repair parts and special tools list is divided into the following sections.

a. *Prescribed Load Allowance List.* Not applicable.

b. *Repair Parts - Section II.* A list of repair parts authorized for the performance of maintenance at the organizational level in figure and item number sequence.

c. *Special Tools Test and Support Equipment.* Not applicable.

d. *Federal Stock Number and Part Number Index -Section III.* A list of Federal stock numbers in ascending numerical sequence followed by a list of part numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

3. Explanation of Columns

a. *Source, Maintenance, and Recoverability Codes, Column 1, are as follows:*

(1) Source code, indicates the selection status and source for the listed item. Source codes used are:

| Code | Explanation                                                                                                                                                                                                                                                         |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P    | Applied to repair parts which are stocked in or supplied from GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.                                                                                                            |
| P2   | Repair parts which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.                                                                  |
| M    | Applied to repair parts which are not procured or stocked but are to be manufactured at indicated maintenance categories.                                                                                                                                           |
| A    | Applied to assemblies which are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories. |
| X    | Applied to parts and assemblies which are not procured or stocked; the mortality of which normally is below that of the applicable end item; and the failure of which should result in retirement of the end item from the supply system.                           |
| X1   | Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of next higher assembly or component.                                                                                                                  |
| X2   | Applied to repair parts which are not stocked. The indicated maintenance category requiring such repair parts                                                                                                                                                       |

This manual supersedes TM 9-4940-205-20P, 28 December 1961.
