Intervals (on-condition or hard time) and the related task-hour times are based on normal operation. The task-hour time specified is the time you need to do all the services prescribed for a particular inter- val. On-condition (OC) oil sample intervals shall be applied unless changed by Army Oil Analysis Program (AOAP) laboratory. Change the hard time interval if your lubricants are contaminated or if you are operating the equipment under adverse operating conditions including longer-than-usual operating hours. The hard time interval may be extended during periods of low activity. If extended adequate preservation precautions must be taken. Hard time intervals will be applied in the event AOAP laboratory support is not available. Clean all lubrication points with dry cleaning solvent (SD), type II

or equivalent.
Dry before lubricating. The lowest level of maintenance to lubricate a point is indi- cated by one of the following:

(C) Operator/Crew or (O) Organizational Maintenance.
